DISCUSSION OF RESULTS — 4Q25 vs. 4Q24

- Net income was \$27 million compared to \$10 million.
- Net interest income increased \$9 million primarily due to the impact of decreasing interest rates on the different index resets for the segment's assets and debt. This was partially offset by the paydown of the loan portfolio. Prepayments were \$225 million in fourth-quarter 2025 compared to \$322 million in fourth-quarter 2024.
- Provision for loan losses decreased \$6 million. The provision for loan losses of \$1 million in the current period was the result of relatively stable credit trends. The \$7 million of provision for loan losses in the year-ago quarter was primarily the result of an increase in delinquency balances.
 - Net charge-offs were \$14 million compared to \$7 million.
 - Delinquencies greater than 90 days were \$2.4 billion compared to \$2.2 billion.
 - Forbearances were \$3.5 billion compared to \$4.4 billion.
- Expenses were \$4 million lower primarily as a result of the outsourcing of the loan servicing of our portfolio to a third party on July 1, 2024. This created a variable cost structure resulting in the significant reduction in expenses (20%) as the portfolio paid down.

CONSUMER LENDING

In this segment, Navient owns and manages a portfolio of Private Education Loans. Through our Earnest brand, we also refinance and originate Private Education Loans.

⁽¹⁾ Fourth-quarter 2025, third-quarter 2025 and fourth-quarter 2024 exclude \$1 million, \$1 million and \$2 million, respectively, of charge-offs on the expected future recoveries of previously fully charged-off loans that occurred as a result of increasing the net charge-off rate on defaulted loans.

DISCUSSION OF RESULTS — 4Q25 vs. 4Q24

- Originated \$680 million of Private Education Loans, an 87% increase compared to \$363 million.
 - Refinance Loan originations were \$634 million compared to \$322 million.
 - In-school loan originations were \$46 million compared to \$41 million.
- Net income was \$25 million compared to \$37 million.
- Net interest income decreased \$13 million, primarily due to the paydown and changing product mix of the loan portfolio (Refinance Loans increased as a percentage of the portfolio).
- Provision for loan losses increased \$5 million. The provision of \$43 million in the current quarter included \$9 million associated with loan originations and \$34 million primarily reflecting our macroeconomic outlook and a response to fourth-quarter delinquency trends within our legacy Private Education Loan portfolio. The provision for loan losses of \$38 million in the year-ago quarter included \$6 million in connection with loan originations, \$18 million related to lowering the expected recovery rate on defaulted loans and \$14 million related to a general reserve build primarily as a result of an increase in delinquency balances.
 - Net charge-offs were \$86 million, up \$15 million from \$71 million.
 - Private Education Loan delinquencies greater than 90 days: \$434 million, up \$15 million from \$419 million.
 - Private Education Loan forbearances: \$236 million, down \$186 million from \$422 million.

BUSINESS PROCESSING

In this segment, Navient performed business processing services for non-education related government and healthcare clients prior to the divestiture of our healthcare services business in third-quarter 2024 and our government services business in first-quarter 2025.

DISCUSSION OF RESULTS — 4Q25 vs. 4Q24

- With the sale of our government services business in February 2025, Navient no longer provides business processing segment services. Navient provided certain transition services (\$0.5 million of revenue and expense in the current quarter, reflected in the Other segment) in connection with the sale of our business processing businesses. As of October 2025 we had no further obligations to provide these transition services.

Definitions for capitalized terms in this release can be found in Navient's Annual Report on Form 10-K for the year ended December 31, 2024 (filed with the SEC on February 27, 2025).

Navient will hold a live audio webcast today, January 28, 2026, at 8 a.m. ET, hosted by David Yowan, president and CEO, and Steve Hauber, CFO.

The webcast will be available on Navient.com/investors. Supplemental financial information and presentation slides used during the call will be available no later than the start time. A replay of the webcast will be available shortly after the event's conclusion.

This news release contains "forward-looking statements," within the meaning of the federal securities law, about our business and prospectus and other information that is based on management's current expectations as of the date of this release. Statements that are not historical facts, including statements about our beliefs, opinions, or expectations and statements that assume or are dependent upon future events, are forward-looking statements and often contain words such as "expect," "anticipate," "intend," "plan," "believe," "seek," "see," "will," "would," "may," "could," "should," "goals," or "target." Such statements are based on management's expectations as of the date of this release and involve many risks and uncertainties that could cause our actual results to differ materially from those expressed or implied in our forward-looking statements. For Navient, these factors include, among other things: general economic conditions, including the potential impact of inflation and interest rates on Navient and its clients and customers and on the creditworthiness of third parties; and increased defaults on education loans held by us. The company could also be affected by, among other things, unanticipated repayment trends on education loans including prepayments or deferrals resulting from new interpretations or the timing of the execution and implementation of current laws, rules or regulations or future laws, executive orders or other policy initiatives that operate to encourage or require consolidation, abolish existing or create additional income-based repayment or debt forgiveness programs or establish other policies and programs or extensions of previously announced deadlines which may increase or decrease the prepayment rates on education loans and accelerate or slow down the repayment of the bonds in our securitization trusts; a reduction in our credit ratings; changes to applicable laws, rules, regulations and government policies and expanded regulatory and governmental oversight; changes in the general interest rate environment, including the availability of any relevant money-market index rate or the relationship between the relevant money-market index rate and the rate at which our assets are priced; the interest rate characteristics of our assets do not always match those of our funding arrangements; adverse market conditions or an inability to effectively manage our liquidity risk or access liquidity could negatively impact us; the cost and availability of funding in the capital markets; our ability to earn Floor Income and our ability to enter into hedges relative to that Floor Income are dependent on the future interest rate environment and therefore is variable; our use of derivatives exposes us to credit and market risk; our ability to continually and effectively align our cost structure with our business operations; a failure or breach of our operating systems, infrastructure or information technology systems; failure by any third party providing us material services or products or a breach or violation of law by one of these third parties; our work with government clients exposes us to additional risks inherent in the government contracting environment; acquisitions, strategic initiatives and investments or divestitures that we pursue; shareholder activism; reputational risk and social factors; and the other factors that are described in the "Risk Factors" section of Navient's Annual Report on Form 10-K for the year ended December 31, 2024, and in our other reports filed with the Securities and Exchange Commission. The preparation of our consolidated financial statements also requires management to make certain estimates and assumptions including estimates and assumptions about future events. These estimates or assumptions may prove to be incorrect and actual results could differ materially. All forward-looking statements contained in this release are qualified by these cautionary

statements and are made only as of the date of this release. The company does not undertake any obligation to update or revise these forward-looking statements except as required by law.

RESULTS OF OPERATIONS

We present the results of operations below first in accordance with GAAP. Following our discussion of earnings results on a GAAP basis, we present our results on a segment basis. We have three reportable operating segments as of December 31, 2025: Federal Education Loans, Consumer Lending and Other. Prior to the divestiture of our healthcare business in third-quarter 2024 and our government services business in first-quarter 2025, we had a fourth reportable operating segment, Business Processing. Our segments operate in distinct business environments and we manage and evaluate the financial performance of our segments using non-GAAP financial measures we call Core Earnings (see “Non-GAAP Financial Measures — Core Earnings” for further discussion).

Three Months Ended December 31, 2025 Compared with Three Months Ended December 31, 2024

For the three months ended December 31, 2025, net loss was \$5 million, or \$0.06 diluted loss per common share, compared with net income of \$24 million, or \$0.22 diluted earnings per common share, for the year-ago period.

The primary contributors to the change in net income are as follows:

- Net interest income decreased by \$17 million primarily due to a \$17 million decrease in mark-to-market gains on fair value hedges recorded in interest expense as well as the paydown of the FFELP and Private Education Loan portfolios and changing product mix of the Private Education Loan portfolio (Refinance Loans increased as a percentage of the portfolio). This was partially offset by the impact of decreasing interest rates on the different index resets for the FFELP Loan assets and debt.
- Provisions for loan losses decreased \$1 million from \$45 million to \$44 million:
 - The provision for FFELP Loan losses decreased \$6 million from \$7 million to \$1 million.
 - The provision for Private Education Loan losses increased \$5 million from \$38 million to \$43 million.

The provision for FFELP Loan losses of \$1 million in the current period was the result of relatively stable credit trends. The provision of \$7 million in the year-ago quarter was the result of an increase in delinquency balances.

The provision for Private Education Loan losses of \$43 million in the current period included \$9 million associated with loan originations and \$34 million primarily reflecting our macroeconomic outlook and a response to fourth-quarter delinquency trends within our legacy Private Education Loan portfolio. The provision of \$38 million in the year-ago quarter included \$6 million in connection with loan originations, \$18 million related to lowering the expected recovery rate on defaulted loans and \$14 million related to a general reserve build primarily as a result of an increase in delinquency balances.

- Asset recovery and business processing revenue decreased \$43 million as a result of the sale of our government services business in February 2025. With the sale of our government services business, Navient no longer provides business processing segment services.
- Gain (loss) on sale of subsidiaries includes a \$28 million loss in the year-ago quarter as a result of our entering into an agreement on December 19, 2024 to sell our government services businesses, resulting in the classification of these businesses as held for sale and adjustment of the basis of these businesses to the expected sales price.
- Net gains on derivative and hedging activities decreased \$55 million due primarily to interest rate fluctuations. Valuations of derivative instruments fluctuate based upon many factors including changes in interest rates and other market factors. As a result, net gains and losses on derivative and hedging activities may vary significantly in future periods.
- Operating expenses decreased \$58 million, \$42 million of which was due to a decline in business processing expenses as a result of the sale of our government services business in February 2025 (\$40 million of the reduction is in the Business Processing segment and \$2 million of the reduction is in the Other segment). In addition, there was a \$6 million decline in expenses in connection with providing transition services related to our various strategic initiatives. As of October 2025 we had no further obligations to provide these transition services. The remaining \$10 million decrease primarily relates to cost saving initiatives implemented which have reduced our operating costs mostly in connection with our shared service functions and corporate footprint.
- Restructuring and other reorganization expenses increased \$6 million primarily due to severance-related costs and asset write-offs related to the retirement of significant components of our legacy technology infrastructure as a result of the various strategic initiatives that have been and continue to be implemented to simplify the company, reduce our expense base and enhance our flexibility.

We repurchased 2.1 million and 4.4 million shares of our common stock during the fourth quarters of 2025 and 2024, respectively. As a result of repurchases, our average outstanding diluted shares decreased by 10 million common shares (or 9%) from the year-ago period.

Year Ended December 31, 2025 Compared with Year Ended December 31, 2024

For the year ended December 31, 2025, net loss was \$80 million, or \$0.81 diluted loss per common share, compared with net income of \$131 million, or \$1.18 diluted earnings per common share, for the year-ago period.

The primary contributors to the change in net income (loss) are as follows:

- Net interest income decreased by \$17 million primarily as a result of the paydown of the FFELP and Private Education Loan portfolios, the changing product mix of the Private Education Loan portfolio (Refinance Loans increased as a percentage of the portfolio) and the net impact of decreasing interest rates on the different index resets for the FFELP Loan and Private Education Loan assets and debt. Additionally, there was a \$12 million decrease in mark-to-market gains on fair value hedges recorded in interest expense. These decreases were partially offset by a \$55 million decline in net premium amortization on the loan portfolios due to both a decrease in prepayment rate assumptions, mostly in response to the significant decline in actual FFELP Loan prepayments since the beginning of 2025, as well as the significant decline in actual FFELP Loan prepayments from \$5.4 billion in the year-ago period to \$977 million in the current period.
- Provisions for loan losses increased \$167 million, from \$113 million to \$280 million:
 - The provision for FFELP Loan losses increased \$30 million from \$1 million to \$31 million.
 - The provision for Private Education Loan losses increased \$137 million from \$112 million to \$249 million.

The provision for FFELP Loan losses of \$31 million in the current period was primarily the result of elevated delinquency balances, our forecasted macroeconomic outlook, as well as the continued extension of the portfolio. The provision of \$1 million in the year-ago period was primarily the result of relatively stable credit trends.

The provision for Private Education Loan losses of \$249 million in the current period included \$41 million associated with loan originations and \$208 million primarily associated with elevated delinquency balances as well as our forecasted macroeconomic outlook. The provision of \$112 million in the year-ago period included \$39 million related to lowering the expected recovery rate on defaulted loans, \$32 million associated with loan originations and \$41 million related to a general reserve build.

- Asset recovery and business processing revenue decreased \$248 million as a result of the sale of our healthcare services business in the third quarter of 2024 (\$88 million of the decrease), and our government services business in February 2025 (\$160 million of the decrease). With the sale of our government services business, Navient no longer provides business processing segment services.
- Other income increased \$17 million primarily related to the transition services we provide related to our various strategic initiatives. The transition services related to the outsourcing of loan servicing and the sale of our healthcare services business ended in May 2025. The transition services related to the sale of our government services business ended in October 2025.
- Gain (loss) on sale of subsidiaries was a \$191 million net gain in the year-ago period which included a \$219 million gain on sale of our healthcare services business in third-quarter 2024 and a \$28 million loss in fourth-quarter 2024 resulting from reclassification of our government services businesses to held for sale commensurate with our entering into an agreement on December 19, 2024 to sell these businesses, resulting in adjustment of the basis of these businesses to the expected sales price.
- Net gains on derivative and hedging activities decreased \$100 million. The primary factor affecting the change was interest rate fluctuations. Valuations of derivative instruments fluctuate based upon many factors including changes in interest rates and other market factors. As a result, net gains and losses on derivative and hedging activities may vary significantly in future periods.
- Operating expenses decreased \$259 million, \$240 million of which was due to a decline in business processing expenses as a result of the sale of our government services business in February 2025 and our healthcare services business in the third quarter of 2024 (\$208 million of the reduction is in the Business Processing segment and \$32 million of the reduction is in the Other segment). In addition, regulatory-related expenses decreased \$35 million primarily due to \$43 million of regulatory-related expenses recorded in the year-ago period in connection with the September 2024 CFPB settlement agreement. Current period expense includes \$30 million, an \$18 million increase from the prior year, of expense in connection with providing transition services related to our various strategic initiatives. There is \$33 million of revenue recognized in the Other segment related to these services.
- Goodwill and acquired intangible asset impairment and amortization expense decreased by \$143 million due to a \$138 million impairment recognized in the year-ago period related to our government services business which was sold in February 2025.
- Restructuring and other reorganization expenses decreased \$22 million primarily due to a decrease in severance-related costs incurred in connection with the various strategic initiatives that have been and continue to be implemented to simplify the company, reduce our expense base and enhance our flexibility.

We repurchased 8.5 million and 11.5 million shares of our common stock during 2025 and 2024, respectively. As a result of repurchases, our average outstanding diluted shares decreased by 12 million common shares (or 11%) from the year-ago period.

⁽¹⁾ Charge-offs are reported net of expected recoveries. For Private Education Loans, we charge off the estimated loss of a defaulted loan balance by charging off the entire defaulted loan balance and estimating recoveries on a pool basis. These estimated recoveries are referred to as "expected future recoveries on previously fully charged-off loans." For FFELP Loans, the recovery is received at the time of charge-off.

⁽²⁾ Related to increasing the net charge-off rate on defaulted Private Education Loans and the resulting reduction in the balance of expected future recoveries on previously fully charged-off loans.

⁽³⁾ At the end of each month, for Private Education Loans that are 212 or more days past due, we charge off the estimated loss of a defaulted loan balance by charging off the entire loan balance and estimating recoveries on a pool basis. These estimated recoveries are referred to as "expected future recoveries on previously fully charged-off loans." If actual periodic recoveries are less than expected, the difference is immediately reflected as a reduction to expected future recoveries on previously fully charged-off loans. If actual periodic recoveries are greater than expected, they will be reflected as a recovery through the allowance for Private Education Loan losses once the cumulative recovery amount exceeds the cumulative amount originally expected to be recovered. The following table summarizes the activity in the expected future recoveries on previously fully charged-off loans:

LIQUIDITY AND CAPITAL RESOURCES

We expect to fund our ongoing liquidity needs, including the repayment of \$0.5 billion of senior unsecured notes that mature in the short term (i.e., over the next 12 months) and the remaining \$4.8 billion of senior unsecured notes that mature in the long term (from 2027 to 2043 with 79% maturing by 2032), through a number of sources. These sources include our cash on hand, unencumbered FFELP Loan and Private Education Refinance Loan portfolios (see "Sources of Primary Liquidity" below), the predictable operating cash flows provided by operating activities, the repayment of principal on unencumbered education loan assets, and the distribution of overcollateralization from our securitization trusts. We may also, depending on market conditions and availability, draw down on our secured FFELP Loan and Private Education Loan asset-backed commercial paper (ABCP) facilities, issue term ABS, enter into additional Private Education Loan and FFELP Loan ABS repurchase facilities, or issue additional unsecured debt.

We originate Private Education Loans (a portion of which is obtained through a forward purchase agreement). We also have purchased and may purchase, in future periods, Private Education Loan portfolios from third parties. Those originations and purchases are part of our ongoing liquidity needs. We repurchased 2.1 million shares of common stock for \$26 million in the fourth quarter of 2025.

Sources of Additional Liquidity

Liquidity may also be available under our secured credit facilities. Maximum borrowing capacity under the FFELP Loan and Private Education Loan ABCP facilities will vary and be subject to each agreement's borrowing conditions, including, among others, facility size, current usage and availability of qualifying collateral from unencumbered loans. The following tables detail the additional borrowing capacity of these facilities with maturity dates ranging from June 2026 to April 2027.

At December 31, 2025, we had a total of \$2.9 billion of unencumbered tangible assets inclusive of those listed in the table above as sources of primary liquidity. Total unencumbered education loans comprised \$1.4 billion of our unencumbered tangible assets of which \$1.3 billion and \$83 million related to Private Education Loans and FFELP Loans, respectively. In addition, as of December 31, 2025, we had \$4.7 billion of encumbered net assets (i.e., overcollateralization) in our various financing facilities (consolidated variable interest entities). We enter into repurchase facilities at times to borrow against the encumbered net assets of these financing vehicles. As of December 31, 2025, \$0.6 billion of repurchase facility borrowings were outstanding.

The following table reconciles encumbered and unencumbered assets and their net impact on total Tangible Equity.

⁽²⁾ At December 31, 2025, September 30, 2025, and December 31, 2024, there were \$(50) million, \$(53) million and \$(181) million, respectively, of net gains (losses) on derivatives hedging this debt in unencumbered assets, which partially offset these gains (losses).

⁽³⁾ Item is a non-GAAP financial measure. For a description and reconciliation, see "Non-GAAP Financial Measures."

NON-GAAP FINANCIAL MEASURES

In addition to financial results reported on a GAAP basis, Navient also provides certain performance measures which are non-GAAP financial measures. We present the following non-GAAP financial measures: (1) Core Earnings, (2) Tangible Equity (as well as the Adjusted Tangible Equity Ratio), (3) EBITDA for the Business Processing segment, and (4) Allowance for Loan Losses Excluding Expected Future Recoveries on Previously Fully Charged-off Loans. Definitions for the non-GAAP financial measures and reconciliations are provided below, except that reconciliations of forward-looking non-GAAP financial measures are not provided because the Company is unable to provide such reconciliations without unreasonable effort due to the uncertainty and inherent difficulty of predicting the occurrence and financial impact of certain items, including, but not limited to, the impact of any mark-to-market gains/losses resulting from our use of derivative instruments to hedge our economic risks.

1. Core Earnings

We prepare financial statements and present financial results in accordance with GAAP. However, we also evaluate our business segments and present financial results on a basis that differs from GAAP. We refer to this different basis of presentation as Core Earnings. We provide this Core Earnings basis of presentation on a consolidated basis and for each business segment because this is what we review internally when making management decisions regarding our performance and how we allocate resources. We also refer to this information in our presentations with credit rating agencies, lenders and investors. Because our Core Earnings basis of presentation corresponds to our segment financial presentations, we are required by GAAP to provide certain Core Earnings disclosures in the notes to our consolidated financial statements for our business segments.

Core Earnings are not a substitute for reported results under GAAP. We use Core Earnings to manage our business segments because Core Earnings reflect adjustments to GAAP financial results for two items, discussed below, that can create significant volatility mostly due to timing factors generally beyond the control of management. Accordingly, we believe that Core Earnings provide management with a useful basis from which to better evaluate results from ongoing operations against the business plan or against results from prior periods. Consequently, we disclose this information because we believe it provides investors with additional information regarding the operational and performance indicators that are most closely assessed by management. When compared to GAAP results, the two items we remove to result in our Core Earnings presentations are:

- (1) Mark-to-market gains/losses resulting from our use of derivative instruments to hedge our economic risks that do not qualify for hedge accounting treatment or do qualify for hedge accounting treatment but result in ineffectiveness; and
- (2) The accounting for goodwill and acquired intangible assets.

While GAAP provides a uniform, comprehensive basis of accounting, for the reasons described above, our Core Earnings basis of presentation does not. Core Earnings are subject to certain general and specific limitations that investors should carefully consider. For example, there is no comprehensive, authoritative guidance for management reporting. Our Core Earnings are not defined terms within GAAP and may not be comparable to similarly titled measures reported by other companies. Accordingly, our Core Earnings presentation does not represent a comprehensive basis of accounting. Investors, therefore, may not be able to compare our performance with that of other financial services companies based upon Core Earnings. Core Earnings results are only meant to supplement GAAP results by providing additional information regarding the operational and performance indicators that are most closely used by management, our Board of Directors, credit rating agencies, lenders and investors to assess performance.

The following tables show our consolidated GAAP results, Core Earnings results (including for each reportable segment) along with the adjustments made to the income/expense items to reconcile the consolidated GAAP results to the Core Earnings results as required by GAAP.

(1) Derivative Accounting: Core Earnings exclude periodic gains and losses that are caused by the mark-to-market valuations on derivatives that do not qualify for hedge accounting treatment under GAAP, as well as the periodic mark-to-market gains and losses that are a result of ineffectiveness recognized related to effective hedges under GAAP. Under GAAP, for our derivatives that are held to maturity, the mark-to-market gain or loss over the life of the contract will equal \$0. In our Core Earnings presentation, we recognize the economic effect of these hedges, which generally results in any net settlement cash paid or received being recognized ratably as an interest expense or revenue over the hedged item's life.

The table below quantifies the adjustments for derivative accounting between GAAP and Core Earnings net income.

⁽¹⁾ Derivative accounting requires net settlement income/expense on derivatives that do not qualify as hedges to be recorded in a separate income statement line item below net interest income. Under our Core Earnings presentation, these settlements are reclassified to the income statement line item of the economically hedged item. For our Core Earnings net interest income, this would primarily include reclassifying the net settlement amounts related to certain of our interest rate swaps to debt interest expense. The table below summarizes these net settlements on derivative and hedging activities and the associated reclassification on a Core Earnings basis.

^(a) Primarily derivatives that are used to economically hedge the origination of fixed rate Private Education Loans that don't qualify for hedge accounting. We believe that these derivatives are effective economic hedges, and as such, are a critical element of our interest rate risk management strategy.

⁽³⁾ Other derivative accounting adjustments consist of adjustments related to certain terminated derivatives that did not receive hedge accounting treatment under GAAP but were economic hedges under Core Earnings and, as a result, such gains or losses are amortized into Core Earnings over the life of the hedged item:

Cumulative Impact of Derivative Accounting under GAAP compared to Core Earnings

As of December 31, 2025, derivative accounting has decreased GAAP equity by approximately \$39 million as a result of cumulative net mark-to-market losses (after tax) recognized under GAAP, but not in Core Earnings. The following table rolls forward the cumulative impact to GAAP equity due to these after-tax mark-to-market net gains and losses related to derivative accounting.

Hedging Embedded Floor Income

We use pay-fixed swaps and fixed rate debt to economically hedge embedded Floor Income in our FFELP loans. Historically, we have used these instruments on a periodic basis and depending upon market conditions and pricing, we may enter into additional hedges in the future. Under GAAP, the pay-fixed swaps are accounted for as cash flow hedges. The table below shows the amount of Hedged Floor Income that will be recognized in Core Earnings in future periods based on these hedge strategies.

| (Dollars in millions) | December 31, 2025 | | September 30, 2025 | | December 31, 2024 | |

⁽¹⁾ \$36 million, \$41 million and \$57 million on a pre-tax basis as of December 31, 2025, September 30, 2025, and December 31, 2024, respectively.

⁽²⁾ Of the \$27 million as of December 31, 2025, approximately \$14 million, \$7 million and \$6 million will be recognized as part of Core Earnings net income in 2026, 2027 and 2028, respectively.

(2) Goodwill and Acquired Intangible Assets: Our Core Earnings exclude goodwill and intangible asset impairment and the amortization of acquired intangible assets. The following table summarizes the goodwill and acquired intangible asset adjustments.

2. Tangible Equity and Adjusted Tangible Equity Ratio

Adjusted Tangible Equity measures the ratio of Navient's Tangible Equity to its tangible assets. We adjust this ratio to exclude the assets and equity associated with our FFELP Loan portfolio because FFELP Loans are no longer originated and the FFELP Loan portfolio bears a 3% maximum loss exposure under the terms of the federal guaranty. Management believes that excluding this portfolio from the ratio enhances its usefulness to investors. Management uses this ratio, in addition to other metrics, for analysis and decision making related to capital allocation decisions. The Adjusted Tangible Equity Ratio is calculated as:

| (Dollars in millions) | December 31, 2025 | September 30, 2025 | December 31, 2024 |
|---|----------------------|-----------------------|----------------------|
| Navient Corporation's stockholders' equity | \$ 2,399 | \$ 2,439 | \$ 2,641 |

3. Earnings before Interest, Taxes, Depreciation and Amortization Expense (EBITDA)

This measures the operating performance of the Business Processing segment and is used by management and equity investors to monitor operating performance and determine the value of those businesses. EBITDA for the Business Processing segment is calculated as:

| EBITDA margin | —% | —% | (167)% | 13% | 51% |

⁽¹⁾ There is no interest expense in this segment.

4. Allowance for Loan Losses Excluding Expected Future Recoveries on Previously Fully Charged-off Loans

The allowance for loan losses on the Private Education Loan portfolio used for the three credit metrics below excludes the expected future recoveries on previously fully charged-off loans to better reflect the current expected credit losses remaining in connection with the loans on balance sheet that have not charged off. That is, as of December 31, 2025, the \$534 million Private Education Loan allowance for loan losses excluding expected future recoveries on previously fully charged-off loans represents the current expected credit losses that remain in connection with the \$15,815 million Private Education Loan portfolio. The \$170 million of expected future recoveries on previously fully charged-off loans, which is collected over an average 15-year period, mechanically is a reduction to the overall allowance for loan losses. However, it is not related to the \$15,815 million Private Education Loan portfolio on our balance sheet and, as a result, management excludes this impact to the allowance to better evaluate and assess our overall credit loss coverage on the Private Education Loan portfolio. We believe this provides a more meaningful and holistic view of the available credit loss coverage on our non-charged-off Private Education Loan portfolio. We believe this information is useful to our investors, lenders and rating agencies.
