Keep the Tablet Charged!

[\[Click here for Speaker/CAT3/2-Conductor, and other non-CAT5/5e/6 Wiring\]](#)

Locate the nearest wall outlet (120-240V A/C) to your tablet mounting location. Plug in our [VidaPower 24V Injector](#) or [24V Switch](#) to the outlet, and connect a standard CAT/Ethernet cable to the appropriate port. Next, run the powered cable to your tablet location (Supports up to 375' [115m] w. CAT5/5e/6) and connect it to the [VidaCharger Power Adapter](#).

Finally, connect your USB charging cable to the USB port of the Adapter, run your charging cable to your device and voila - we've connected your device to an A/C outlet up to 375' away! You're good!
